

Detailed Analysis of School Performance in Toledo (2007-08)

*Graph I: Percent of Toledo Students in Public Schools by State Designation versus the Big 8 Average**

Percent of Toledo Students in Public Schools by State Designation versus the Big 8 Average.

Graph I shows how Toledo district and charter school students performed against the Big 8 averages for district and charter performance. This helps to put the performance of students in Toledo into a larger context (e.g., how do they perform against other urban students in Ohio?) Toledo students overall outperform their Big 8 peers (38 percent of Toledo students are in a school rated academic emergency or academic watch while the Big 8 average is 51 percent). In Toledo, students in the Toledo Public Schools outperformed their peers in Toledo charters. In 2007-08, 14 percent of students attending TPS schools were attending a school rated academic emergency, while more than half (51 percent) of charter students in Toledo were attending an academic emergency school.

* The Big 8 districts are defined as Ohio's largest urban districts: Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Toledo, and Youngstown.

Graph II: Percent of Toledo Students in Public Schools by Value-added Composite Score versus the Big 8 Average (2007-08)

Percent of Toledo Students in Public Schools by Value-added Composite Score versus the Big 8 Average. For the first time in 2007-08, Ohio’s local report cards include each school’s “value-added”—how much progress students made in reading and math over the course of one year compared to how much the state expected them to gain (for a detailed explanation go to: http://www.edexcellence.net/detail/news.cfm?news_id=735&id=130). Using this information Ohio determined if each school made “Above Expected Growth,” “Expected Growth,” or “Below Expected Growth.”

In Toledo, 58 percent of all students in public schools (district and charter) made less than a year’s worth of expected growth in 2007-08. This contrasts with the Big 8 urban district average where 51 percent of all students made less than a year’s worth of expected growth in 2007-08. Charter students in Toledo made significantly more growth than their district peers with 67 percent of charters meeting or exceeding growth targets. In contrast, 63 percent of Toledo City School students failed to meet or exceeded the state’s growth targets. What this means in practice is that a significantly larger percentage of students in Toledo’s charter schools learned more in 2007-08 than did their peers in district schools. Across the Big 8 charters slightly outperformed the district average in 2007-08 (51 percent of charter students were at or above expected growth) than Big 8 district students (only 48 percent were at or above expected growth).

Table I: Toledo Public Schools (District and Charter) Ranked by Performance Index Score

The following pages list Toledo's public charter and district schools ranked by Performance Index (PI) score[†] for the 2007-08 school year. Numerous other performance indicators are also included, but the Performance Index score was selected for ranking the schools because it provides an overall indication of how well students perform on all tested subjects in grades 3 through 8 and the Ohio Graduation Test.

We strongly encourage readers to look closely at the number of standards met and the number of standards possible. A school with a large number of possible standards and possible standards met has gotten a large percentage of students to the state proficiency goals.

We also encourage readers to consider schools' value-added results. Where the Performance Index reflects student achievement at one point in time, value-added tells us how a school is doing at helping its students make progress from year to year. For more on value-added, see Fordham's value-added primer on our website:

http://www.edexcellence.net/detail/news.cfm?news_id=735&id=130.

[†] The Performance Index score is calculated by multiplying the percentage of students that are untested, below basic/limited, basic, proficient, accelerated, or advanced by weights ranging from 0 for untested to 1.2 for advanced students. The totals are then summed up to obtain the school or district's PI score. PI scores range from 0 to 120, and the state has set the goal for all schools to achieve a PI score of 100 or better. For a complete description of how the Ohio Department of Education calculates the PI score see their website here: <http://www.ode.state.oh.us/GD/DocumentManagement/DocumentDownload.aspx?DocumentID=29878>.

Table I: Toledo Public Schools (District and Charter) Ranked by Performance Index Score

Rank	Building Name	Type	PI Score 07-08	PI Score 06-07	Designation 07-08	Overall AYP 07-08	# of standards met 07-08	# of standards possible 07-08	Value-added Composite 07-08	Enrollment	Grade Span
