

Detailed Analysis of School Performance in Toledo (2008-09)

**Graph I: Percent of Toledo Students in Public Schools by State Designation
(2007-08 and 2008-09)**

Source: Ohio Department of Education interactive Local Report Card

Note: This chart does not include students in schools that are unrated and students attending charter e-schools.

Percent of Toledo Students in Public Schools (District and Charter) by State Designation.

Graph I shows the percent of Toledo students in district and charter schools by state designation for the 2007-08 and 2008-09 school years.

In 2008-09, 23 percent of public school students in Toledo (district and charter) were attending schools the state rated Effective or Excellent (including Excellent with Distinction), up from 16 percent in 2007-08. The number of Toledo Public School District students in a “D” or “F” school remained steady from 2007-08 to 2008-09, at 34 percent. Charter school students in Toledo were less likely in 2008-09 than the previous year to attend a school rated Academic Emergency or Academic Watch by the state. In 2007-08, 59 percent of charter students attended a “D” or “F” school, versus 52 percent in 2008-09.

**Graph II: Percent of Toledo Students in Public Schools by State Designation
versus the Big 8 Average***

Percent of Toledo Students in Public Schools by State Designation versus the Big 8 Average.

Graph II shows how Toledo district and charter school students performed against the Big 8 averages for district and charter performance. This helps to put the performance of students in Toledo into a larger context (e.g., how do they perform against other urban students in Ohio?)

Public school students in Toledo (both district and charter) were less likely to attend a “D” or “F” school than their Big 8 peers. In 2008-09, less than two in five Toledo students (38 percent) went to a school rated in Academic Emergency or Academic Watch, compared to nearly half (49 percent) of Big 8 students in similar schools. Toledo charter students were more likely to attend an “F” school than their Big 8 charter student counterparts, but also more likely to attend a charter school rated an “A.” Almost one half (47 percent) of Toledo charter students attended a school in Academic Emergency, versus 39 percent of Big 8 charter students. Of charter students in Big 8 cities, eight percent attended an Excellent school, in contrast to 11 percent of Toledo charter students who went to an Excellent school.

* The Big 8 districts are defined as Ohio’s largest urban districts: Akron, Canton, Cincinnati, Cleveland, Columbus, Dayton, Toledo, and Youngstown.

Graph III: Percent of Toledo Students in Public Schools by Value-added Composite Score versus the Big 8 Average (2008-09)

Source: Ohio Department of Education interactive Local Report Card

Note: This chart does not include students in schools that did not receive a value-added composite score or students attending charter e-schools.

Percent of Toledo Students in Public Schools by Value-added Composite Score versus the Big 8 Average. Ohio's local report cards include each school's "value-added"—how much progress students in grades four through eight made in reading and math over the course of one year compared to how much the state expected them to gain (for a detailed explanation go to: http://www.edexcellence.net/detail/news.cfm?news_id=735&id=130). Using this information Ohio determines if each school made "Above Expected Growth," "Expected Growth," or "Below Expected Growth."

Overall, students in charter and district schools in Toledo are as likely as their peers in the Big 8 cities to attend a school that met or exceeded the state's annual growth expectation: 83 percent of Toledo students attended such a school, compared to 82 percent of Big 8 students. Toledo Public School District students are more likely than their charter peers to attend a school that achieved more than one year of academic growth in 2008-09, 69 percent of district students versus just 15 percent of charter students.

Table I: Toledo Public Schools (District and Charter) Ranked by Performance Index Score

The following pages list Toledo's public charter and district schools ranked by Performance Index (PI) score[†] for the 2008-09 school year. Numerous other performance indicators are also included, but the Performance Index score was selected for ranking the schools because it provides an overall indication of how well students perform on all tested subjects in grades 3 through 8 and the Ohio Graduation Test.

We strongly encourage readers to look closely at the number of standards met and the number of standards possible. A school with a large number of possible standards and possible standards met has gotten a large percentage of students to the state proficiency goals.

We also encourage readers to consider schools' value-added results. Where the Performance Index reflects student achievement at one point in time, value-added tells us how a school is doing at helping its students make progress from year to year. For more on value-added, see Fordham's value-added primer on our website:

http://www.edexcellence.net/detail/news.cfm?news_id=735&id=130.

[†] The Performance Index score is calculated by multiplying the percentage of students that are untested, below basic/limited, basic, proficient, accelerated, or advanced by weights ranging from 0 for untested to 1.2 for advanced students. The totals are then summed up to obtain the school or district's PI score. PI scores range from 0 to 120, and the state has set the goal for all schools to achieve a PI score of 100 or better. For a complete description of how the Ohio Department of Education calculates the PI score see their website here: <http://www.ode.state.oh.us/GD/DocumentManagement/DocumentDownload.aspx?DocumentID=29878>.

Table I: Toledo Public Schools (District and Charter) Ranked by Performance Index Score
